President’s Message

I hope everyone is having a safe and enjoyable summer!

Our annual summer planning meeting was held on August 6th and we are going to have an excellent year. My thanks to Vicki Serafin and Joe Janiga for making the necessary arrangements to allow us to use a conference room at the offices of Affiliated FM while mine was unavailable.

As usual, on the back of this issue is the schedule for upcoming meetings and events for 2008 and 2009. I hope you will mark your calendars accordingly now so you can attend all of our meetings and programs.

Why should you attend you ask? The answer is simple. I cannot think of a better way to network with your peers, gather a tremendous amount of knowledge, converse with experts in our field, build your own reputation amongst your peers, represent your organization or company, and enhance your own personnel career development.

I am always open to ideas, comments and suggestions so if anyone has any thoughts they would like to share with me, just let me know.

I look forward to seeing everyone on September 8!

David Gluckman
NJ SFPE Chapter President
NJ SFPE Membership Meeting Minutes
June 9, 2008

Meeting was held at the Hanover Manor.

- President Dave Gluckman called the meeting to order at 6:00 P.M.
- The previous minutes were accepted.
- The Treasurer’s Report was accepted.
- Elections - Slate of officers accepted for 2008 - 2009.
- Ed Armm put forth a motion requesting that the New Jersey Chapter sponsor (donation $500.00) Mr. Art Black, representing the Automatic Fire Alarm Association to put on a seminar for authorities having jurisdiction at Seton Hall University on July 31, 2008. Motion accepted.
- Jerry Naylis presented the following information:
  - DCA Commissioner Joe Doria adopted sprinkler protection for balconies.
  - Adoption of the 2006 International Fire Code - effective date 2009. Note: Appendix “B” was not adopted.
  - DCA to perform a realistic high rise sprinkler cost evaluation.
- Presentations:
  - Joe Janiga received the President’s Award.
  - Vinny Fischera received the “Hat’s Off” Award.

- Evening’s Presentation:
  - Russ Fleming (current National SFPE President) representing The National Fire Sprinkler Association.
  - Topic: The Case for Automatic Sprinklers in Habitational Occupancies.
- Meeting Concluded: 7:45 P.M.

2008 NJ SFPE Chapter Golf Outing Results (West Point Golf Club 6/23/08)

The Chapter held its annual gold outing at West Point Golf Club on June 23rd. Profits to this event go to the joint NY and NJ chapter James R. O’Neil and W. Robert Powers Scholarship Program. This program awards scholarships to students going into the Fire Protection Engineering field. Over 100 Chapter members and guests attended the event. Pictures of the event are contained throughout this issue.

The statistics for the outing are as follows:

**Outing Champions - 4 player scramble**
Jim Goerl
Peter Bell
Lance Harry
Jon Ingram

Score 63 (Score Card playoff)

**Men’s Longest Drive** - Andrew Sims
**Lady’s Longest Drive** - Megan Miller

**Closest to the Pin** - John McBride

The outing netted $5,442.57 for the Scholarship Fund.
Chapter President David Gluckman presents Vinny Fichera with "Hats Off" award for his support in helping arrange many of the past year’s monthly speakers for our programs.

Chapter President David Gluckman presents Joe Janiga with President’s award for dedication and service to the chapter in numerous areas of operation including the Chapters web site, monthly programs, PE examination, Auditing, etc.

**Warning: Hot Coffee!**

**Topic: Biodiesel Products and Manufacturing**

**Learning objective:** The student shall be able to identify sources for biodiesel product and manufacturing information.

As fuel prices continue to rise, more and more backyard inventors will tinker with ideas to discover low-cost alternatives to gasoline and petroleum-based diesel.

On product that has some market potential is “biodiesel,” a motor vehicle fuel created from one or more organic products such as soy, corn, grasses, or animal fats. The home operation in the photograph used recycled cooking oil from a fast food restaurant to make biodiesel.

While the finished product may resemble a Class IIIIB combustible liquid, the manufacturing process itself may involve significantly more hazardous materials. To make biodiesel, an alcohol (Class IB) and base are required. Generally, ethanol or methanol are mixed in a sodium hydroxide solution. If not mixed properly under strictly controlled conditions, an exothermic reaction may cause a small deflagration.

To learn more about biodiesel products and manufacturing, you might want to visit some of these Web sites:

- American Ag Fuels ------- www.americanagfuels.com
- Ag Processing, Inc. ------- www.agp.com
- Biotane Fuels ---------- www.biotanefuels.com
- Grease Works Cooperative ---- www.greaseworks.org
- National Biodiesel Board ----- www.biodiesel.org
- Pacific Biodiesel -------- www.biodiesel.com
- Smithfield BioEnergy ------ www.bestbiofuels.com

If you are asked to be involved in the review and approval of a biodiesel or other alternative fuel manufacturing or storage operation, you may want to obtain qualified, third-party technical assistance to help you with the approval process.

CSB Releases New Safety Video on Fatal 2006 Oilfield Explosion in Mississippi, Emphasizes Safe Practices for Hot Work

The following message is from the U.S. Chemical Safety Board, Washington DC.

Washington, DC, July 17, 2008 - The U.S. Chemical Safety Board (CSB) today released a new safety video detailing an explosion that led to the deaths of three contractors at the Partridge-Raleigh oilfield in rural Raleigh, Mississippi, in June 2006.

All the victims were employees of Stringer's Oilfield Services, an independent contract firm hired by Partridge-Raleigh to perform maintenance on oil storage tanks at the facility.

Entitled 'Death in the Oilfield,' the nine-minute video is based on the CSB's final investigation report, which was voted on and approved by the Board in June 2007. The video is available for viewing and downloading in the Video Room of the CSB's website, Safetyvideos.gov as well as on the CSB channel on YouTube (www.youtube.com/USCSB). DVDs of the video will be provided at no charge through the online request form at CSB.gov.

The new video includes a 3-D computer animation depicting the sequence of events that led to the explosion, which occurred when sparks from a welding operation ignited flammable vapors venting from a storage tank. The animation describes the preparation of the site by Stringer's employees and the unsafe hot work that led to the accident.

The video, which includes interviews with CSB investigators and Board Member William E. Wright, highlights the key safety lessons and board recommendations from the CSB's year-long investigation of the accident. The investigation determined that neither Partridge-Raleigh nor Stringer's Oilfield Services followed safe practices for hot work, which includes operations such as cutting, welding, and grinding that can generate sparks and ignite flammable materials. The CSB's final report called for increased inspection and enforcement of OSHA safety standards at oil production facilities.

'This is the fourth fatal oilfield accident the CSB has investigated since 1998, which underscores the need for improved safety practices in this industry,' Mr. Wright said. 'It is our hope this video will be widely viewed in the U.S. oil production sector so that readily preventable accidents like the one in Mississippi are less likely in the future.'

CSB safety videos have been viewed over one million times over the Internet since the launch of the program in December 2005. More than 75,000 DVDs have been distributed to industry and labor groups, government agencies, safety trainers, educators, emergency responders, and individual requesters throughout the world.

The CSB is an independent federal agency charged with investigating industrial chemical accidents. The agency's board members are appointed by the president and confirmed by the Senate. CSB investigations look into all aspects of chemical accidents, including physical causes such as equipment failure as well as inadequacies in regulations, industry standards, and safety management systems.

The Board does not issue citations or fines but does make safety recommendations to plants, industry organizations, labor groups, and regulatory agencies such as OSHA and EPA. Visit our website, www.csb.gov.

For more information, contact Daniel Horowitz at (202) 261-7613 / (202) 441-6074 cell.
Career Opportunities

Position Description:

Company Description: Schirmer Engineering is internationally recognized as one of the premier fire protection engineering, life safety and security consulting firms in the world. Founded in 1939, we are one of the oldest and most trusted names in fire protection engineering, with offices located throughout the United States.

Location: Schirmer Engineering is currently looking for engineers to fill new positions in our New York Metropolitan area office located in White Plains, NY.

Minimum Education: Interested individuals should have a M.S., B.S., or Associates Degree in Fire Protection, Mechanical, or Electrical Engineering, Architecture, Architectural Engineering, or related fields. Individuals having an AIA certification, an EIT, or P.E. in Fire Protection Engineering or a related field are preferred.

Minimum Work Experience: Schirmer Engineering welcomes inquiries from individuals from all levels of experience, although individuals having 3 to 7 years of related engineering experience are preferred. Work experience should demonstrate growth and a proportional increase in technical, project management, business development and related responsibilities.

Special Skills: Applicants should be technically oriented, with good analytical and organizational skills. Excellent communication skills (written and oral) required. Individuals should have a broad knowledge of general building construction methods, familiarity with building and life safety codes, and experience in working with contractors, architects, and/or engineers. Knowledge and background with computer fire modeling techniques and performance-based design is a plus. The selected individual must have the ability to work both independently and in a team environment. Persons with the desire for career growth and interested in participating in the development of a rapidly growing, dynamic office are encouraged to apply.

Duties and Responsibilities: Technical responsibilities will include fire protection system design, specification development, construction period services, building surveys, building code consulting, computer fire, smoke and egress modeling, plan review, accessibility consulting, and related fire protection, life safety and building code consulting services. The selected individual will also assist in the development of project proposals and participate in business development. Candidates with appropriate experience will participate in, and direct financial and technical management of assigned projects.

Contact Information: For additional information regarding Schirmer Engineering, please see our website at www.schirmereng.com. Forward confidential resumes and inquiries to:

Michael J. Rzeznik, P.E.
Manager – New York Regional Office
1 Barker Avenue, Third Floor White Plains, NY 10601
(914) 949-0555
Mike_Rzeznik@schirmereng.com

Loss Control Consultant

Outstanding, independent, full-service loss control firm is looking for a consultant in central New Jersey. This company specializes in risk analysis and property loss control. The company is growing and a leader in their industry. For more information about this opportunity please contact:

Greg McDowell
WESTPORT ONE
11701 Borman Drive, Suite 250
St. Louis, MO 63146

Chubb Fire Protection Seminars

If you are looking for hands on fire protection training, then these are the classes for you. Classes are conducted in Chubb's Training Center which is located in Warren, NJ (30 minutes from NYC). Facility managers, sprinkler contractors, and compliance officers have found these sessions to be informative, practical and applicable to their jobs. All classes are now CEU approved in NJ, PA, NY and CT. You can get a detailed description of each class at http://www.chubb.com/lcu. Attached is a registration form.

Understanding the Fire Alarm Requirements of the International Building Code® Seminar

Sponsored by:
The Automatic Fire Alarm Association of New Jersey
November 20, 2008
At The Hanover Manor, 16 Eagle Rock Avenue
East Hanover, New Jersey 07936
Go to www.AFANJ.org for directions and a map

This seminar is beneficial for designers of fire alarm systems, project managers or lead installers responsible for fire alarm systems, sales people and authorities having jurisdiction responsible for fire alarm system plan review and/or acceptance testing. Discussions and practical exercises intended to improve the participant’s knowledge of how to use the building fire codes for determining fire alarm requirements. This seminar is primarily based on the IBC®, 2006 edition.

SEMINAR INFORMATION
WHEN: 8:00 am to 4:00 pm
Thursday - November 20, 2008

FIRE ALARM SYSTEM TESTING & INSPECTIONS SEMINAR

SPONSORED BY:

THE AUTOMATIC FIRE ALARM ASSOCIATION OF NEW JERSEY

September 18, 2008
At our new meeting location;
The Hanover Manor, 16 Eagle Rock Avenue
East Hanover, New Jersey 07936

Go to www.AFAANJ.org for directions and a map

This basic application course describes the requirements for fire alarm systems tests and inspections, and how to correctly perform these tests and visual inspections to meet the requirements of the 2002 editions of NFPA 72, National Fire Alarm Code, and NFPA 70, National Electrical Code. This fire alarm seminar is beneficial for installers performing acceptance or reacceptance tests of new fire alarm systems; service technicians performing periodic testing and inspections of existing fire alarm systems; building and fire inspectors involved in witnessing acceptance and reacceptance testing; and personnel representing the owner responsible for the testing and inspections of fire alarm systems in their facilities.
