President’s Message….

The 2019 NJSFPE-AFAANJ Technical Symposium was a tremendous success. We had over 100 attendees along with over 30 sponsors/exhibitioners covering a broad range of fire protection topics and equipment. Our guest speakers covered topics from the challenges of “in building emergency responder radio coverage” and Active Shooter Incidents to fire protection on construction sites and in Cannabis growing & processing facilities. We all learned methods to meet these challenges.

I want all members to take the time to thank Jim Loftus for substantially planning and executing this premiere fire protection education event for NJSFPE and AFAANJ. Jim has been quietly and deliberately working hard to make this event meaningful and successful for both of our organizations.

Mark your calendars, on Monday, May 6th, Dave Newhouse with Gentex will make a presentation on the recent changes to the UL 268 Smoke Detector Standard.

Also, the James Goerl Memorial Golf outing will be held on Monday, June 3rd at the New York Country Club. Go to the NJSFPE.org website to register.

Paul

Chapter President
Month after ITC explosion at Deer Park plant, fire investigators enter tank farm

Nearly a month after a chemical holding plant caught fire and exploded, fire investigators on Tuesday entered the tank farm at the charred Deer Park plant for the first time as they sought answers into how and where the blaze started. Remediation done in the last week at Intercontinental Terminals Co. put investigators in a better position to enter the farm, said Rachel Moreno, a spokeswoman for the Harris County Fire Marshal's office. The farm held 15 tanks, many containing components to make gasoline.

The fire that erupted March 17 sent a plume of dark smoke into the skies over Houston, raising concerns about air and water quality in the area. No serious injuries were reported.

The Bureau of Alcohol, Tobacco, Firearms and Explosives is assisting in the investigation. Moreno had said the federal agency could provide electrical and fire-science engineers. The U.S. Chemical Safety and Hazard Investigation Board and the federal Occupational Safety and Health Administration are also on site conducting their own investigations.

Fire investigators wearing HAZMAT suits and air-purifying respirators entered the site four times and completed the initial scene investigation, which included taking photos and video, Moreno said. As of Tuesday afternoon, they had not determined the origin or cause of the fire and it was unclear what would come next or whether future entries were planned. Officials had suspended cleanup efforts, but they were expected to resume after the fire marshals left the site.

Authorities said in a press conference Tuesday that they had secured 11 tanks and the tank farm itself, which lowers the risk for re-ignition and escaping vapors. The next phase includes de-gassing each tank to remove residual vapors so crews can wash each tank.

Material recovered from the water and tank farm is being stored in other farms in the terminal, and the company will work with government agencies to determine a “proper way forward,” said Brent Weber, ITC’s incident commander.

Nearly 120,000 barrels of oily water mix have been removed from the waterways, nearly twice as much as was reported last week. And as of 7 a.m. Tuesday, close to 172,000 barrels of product mixed with water and firefighting foam had been removed from the tank farms, officials said.

Air monitoring continues, but so far readings have not warranted notification to local governments, state and federal officials said. Past readings showed spikes in benzene, which prompted a shelter-in-place warning in the Deer Park area.

Authorities also said that nearly four dozen animals have died since the incident, including five red-eared slider turtles, six opossum, 15 birds and 21 fish. None are on an endangered species list, said Adam Adams with the U.S. Environmental Protection Agency.

Out of 21 birds recovered, 11 are ready to be released and six died during rehabilitation, Adams said.

In the meantime, the Houston Ship Channel, which was temporarily closed to regular traffic for more than a week, is operating at near-capacity, said Kevin Oditt, sector commander for the U.S. Coast Guard.

A containment wall breached at the charred tank farm last month and released an unknown amount of chemicals and firefighting foam into the waterway, prompting daylight restrictions on ship channel traffic. Those restrictions were lifted Friday, Oditt said.

None of last week’s inbound ships required decontamination. Tugs and barges are operating at 65 percent to 75 percent capacity.

The leading edges of the affected area in the ship channel are Peggy Lake to the east and Sam Houston Parkway to the west. There were 117 skimmers and 48 vacuum trucks on the channel working cleanup operations as of Tuesday.

Officials also confirmed that storms this past weekend had not adversely affected cleanup efforts. "The storm helped to flush the drainage pathways and any product into our recovery locations," Adams said.

Authorities continue to say they have no timeline for how long cleanup operations will take.

"It’s day by day," Adams said. "We’ll know when we get there."

Perla Trevizo covers environmental affairs for The Chronicle. She can be reached at perla.trevizo@chron.com

**SFPE Education Foundation Annual Golf Outing June 3**

All, Our annual Scholarship Golf Outing is fast approaching !! The outing will be held at the same place as last year, the New York Country Club. See attached flyers for both golfers and sponsors. The event is Monday June 3, 2019. We need sponsors so feel free to pass the flyers around to companies and vendors you think would love to participate and support the foundation.

As always the proceeds from the Outing benefits Foundation scholarships and programs and is a great way to support our cause and have fun at the same time. We are a 501c3 organization so sponsorships are tax deductible!

Don't delay, organize and submit your foursome today!

Thanks for all your support over the years and lets have a great outing again this year.

Statement from the US Chemical Safety Board on Recent Tank Fires in Deer Park, TX

The U.S. Chemical Safety Board will investigate the recent fire at the Intercontinental Terminals Company (ITC) site in Deer Park, TX. CSB investigators will start interviews next week and plan to be on site for several days to document the scene and collect evidence. The massive fire, which began on March 17th, engulfed 11 above ground storage tanks containing a variety of hydrocarbons, resulting in multiple orders for community members to Shelter in Place.
K28 ESFR Sprinkler Now FM Approved to Protect Storage Facilities up to 55 ft High

Viking’s K28 ESFR is now FM Approved to protect high-piled storage up to 50 ft in storage facilities with ceilings as high as 55 ft, without requiring an in-rack sprinkler system. As a result, the Model VK514 pendent sprinkler can significantly reduce installation and maintenance costs while increasing racking flexibility in warehouses as high as 55 ft.

The new FM Approval is offered in addition to the VK514 sprinkler’s existing UL Listing, which provides ESFR sprinkler protection in warehouses up to 48 ft in height. The FM Approval classifies the Model VK514 as a Quick Response Storage sprinkler, approved to protect Class 1-4 commodities and Group A, cartoned, unexpanded plastics. The FM design specifies a starting head pressure of 80 psi with a remote area calculation consisting of nine sprinklers (three by three array).

The K28 sprinkler is available in both ordinary and intermediate temperature ratings – 165°F and 205°F – and with a 1” NPT thread size.

The Most Complete Line of Storage Sprinklers
Viking’s robust line of storage sprinklers is specifically designed to suppress high-challenge fires without the need for in-rack sprinklers. In addition to the K28 ESFR-style pendent sprinkler, Viking also offers K14, K17, K22 and K25 ESFR sprinklers. Viking’s leading line of storage sprinklers also includes dry-type ESFR pendent sprinklers (K14 and K17) as well as CMDA, CMSA, and EC storage sprinkler options.

For ordering information, or to learn more about Viking's complete line of storage sprinklers, please contact your local Viking SupplyNet sales representative.
FIRE PROTECTION AND LIFE SAFETY
CONSULTANT
Los Angeles – St. Louis – New York City

Company Background

Code Consultants, Inc. (CCI), a privately held and internationally recognized fire protection engineering and life safety consulting firm, is seeking experienced professionals to join our New York City office.

Founded in 1973, CCI is an industry leader, providing a diverse range of crucial fire protection and life safety consultation and design services including but not limited to:

- building and fire code consulting
- life safety consulting
- hazardous materials analysis
- accessibility consulting
- fire sprinkler design
- fire alarm design
- mass notification design
- fire and egress modeling

CCI’s experienced and trained team of over 80 professionals consist of fire protection engineers, architects, civil/mechanical/electrical engineers, code officials and members of the fire service. At CCI we value our team members and continuously strive to provide a great culture, career and personal development opportunities.

As a privately held firm, CCI’s management team is fully responsible for the strategic direction of the firm and successfully manages growth by maintaining a stable organizational structure, consistent professional service products across our offices, and applying objective performance-based compensation.

Role

As a member of the CCI team your responsibilities will include:

- Fire protection and life safety code consultation for a wide variety of projects and clients.
- Fire and egress modeling and developing alternate method concepts.
- Collaborating with CCI team members and clients, and interfacing with Building/Fire Officials.
- Participating in business development initiatives to expand and develop CCI services.
- Participating in the growth and development of your office, and CCI as a whole.

Qualifications

Ideal candidates will possess the following:

- A degree in fire protection engineering or related engineering discipline.
- Knowledge of Building/Fire/NFPA Codes and Standards related to fire protection and life safety.
- Excellent written and verbal communications skills.
- Be motivated by growth opportunities for themselves and CCI.
- Passion for providing the highest level of services to CCI clients.
- Sufficient experience to work autonomously on project related tasks.
- Fundamentals of Engineering (FE) or Professional Engineering (PE) licensure is desirable, but not required.

Compensation

CCI offers an excellent compensation package with an objective performance-based bonus program and benefits (including 401(k) with matching contributions, health, dental, vision, life and disability plans).

Contact

Interested and qualified candidates may send resumes to CCI’s Human Resources Department at HR@CodeConsultants.com.

Code Consultants, Inc. is EOE/Minorities/Females/Vet/Disabled
Property Loss Control Engineer

Sompo International Holdings Ltd. (Sompo International) is a specialty provider of property and casualty insurance and reinsurance, established in March 2017 as the result of the acquisition of Endurance Specialty Holdings Ltd. by Sompo Holdings Ltd. (Sompo).

Sompo's core business encompasses one of the largest property and casualty insurance groups in the Japanese domestic market. In addition, Sompo is engaged in the provision of insurance services as well as other related services through its global network of businesses operating in 32 countries around the world.

Sompo International is the international operation and a wholly owned subsidiary of Sompo, which trades on the Tokyo Stock Exchange. Through our operating subsidiaries, Sompo International underwrites agriculture, professional lines, property, marine and energy, and casualty and other specialty lines of insurance and catastrophe, property, casualty, professional lines, weather risk and specialty lines of reinsurance.

As a leading global provider of insurance and reinsurance, we recognize that our success is derived directly from those who matter most: our people. Sompo International's headquarters is in Bermuda and we currently have offices in the United States, the United Kingdom, Continental Europe, and Asia. At Sompo International, a shared commitment to integrity, teamwork, agility, execution, and excellence define our culture, and we strive to create exceptional value for our clients and shareholders and maintain Sompo International as a desirable place to work.

We are seeking a HPR Property Loss Control Consultant for our Global Risk Solutions team. Global Risk Solutions offers comprehensive loss control services targeted at select industry verticals. Servicing middle market and large accounts domiciled in the U.S., we work through a network of retail brokers who share our commitment to long-term partnerships built on white glove service. This position will have the opportunity to work remotely.

The Loss Control Consultant will provide risk improvement consultation services for highly valued large and middle market commercial customers; providing added value for our clients. The focus of this position is to evaluate property risks, conduct on-site visits of existing and prospective clients and aid the underwriters in the selection and pricing of an account. The Loss Control Consultant will also be responsible to track trends at an account and book level and communicate effectively with our clients and brokers. Candidate must have proficiency in property, specifically HPR property loss control skills.

**Duties and Responsibilities:**

Prioritization and evaluation of new and renewal work volumes to meet the goals of the department; . Possess a comprehensive understanding of the following areas: property and HPR (Highly Protected Risk) loss control exposures and risk control techniques.; .

- Ability to create client facing reports and/or loss control surveys; .
- Conduct loss control surveys at client locations to determine potential hazards and risk factors to be considered in underwriting/risk selection;
- Analyze loss or exposure trends, recognize opportunities to provide risk control products and/or services which can help reduce losses.
- Attend client/broker meetings, lunches, dinners and other social outings as applicable; .
- Expand existing relationships and new prospective clients; .
- Ensures compliance with all regulations and keeps abreast of any changes to laws and regulations which pertain to loss control;
- Explore and develop new technologies for delivering loss control services;
- Designs, develops, organizes and conducts training and staff development programs for internal and external customers; and .
- Responsibilities also include the production of thought leadership articles or creation of LC library resources; and
Fire Protection Engineer position opening at Brookhaven National Laboratory

A new Fire Protection Engineer position (Job ID 1523) has opened at Brookhaven National Laboratory. Brookhaven National Laboratory is a multipurpose research institution funded primarily by the U.S. Department of Energy’s Office of Science. Located on the center of Long Island, New York, Brookhaven Lab brings world-class facilities and expertise to the most exciting and important questions in basic and applied science—from the birth of our universe to the sustainable energy technology of tomorrow. We operate cutting-edge large-scale facilities for studies in physics, chemistry, biology, medicine, applied science, and a wide range of advanced technologies. The Laboratory’s almost 3,000 scientists, engineers, and support staff are joined each year by more than 4,000 visiting researchers from around the world.

The following link details a much more comprehensive description of the job position and the ability to apply for it on-line:

If you should have further questions please contact:

Michael Kretschmann PE NYSCEO
Brookhaven National Laboratory
Fire Protection Engineering Manager
Lead Fire Protection Engineer
Building 902, Rm U29
P.O. Box 5000, Upton, NY 11973
(631) 344-5274
kretschmann@bnl.gov

Qualifications:

- A minimum of ten (10) years of experience in Property & HPR Loss Control within P&C insurance and/or private industry/government with at least (5) years in a Global Risk Management/technically complex environment.
- Established relationships with retail producers.
- Ability to plan strategically and prioritize workload to meet production and management objectives.
- Ability to be a team player.
- Ability to travel up to 35% of time. Travel will include driving, air travel, and overnight trips.

Sompo International offers a competitive compensation and benefits package commensurate with experience.
